In as much as a number of people are taking an interest in the mineral prospects of Bollinger day of the next term of the Probate County, we believe the Bollinger County, to be held at Marble Hill in said county, on Monday, copie are taking an interest in the will be of interest to a large num ber of our readers, and we give the report in full, as it appeared in the Fredpricktown Democrat News:

"L W. Marstells, state mine inspector, has the following to say of Madison county, be having just re-turned from an official wint to this.

"Madison county surnished lead to the Chicanaw Indiana for how many years prior to 1720, we have be record; but from 1720 to 1869, the lead ore of this county, as well as that of the counties of St. Francois and Washington, was mined in avery crude way, the developments made consisting only of pitz or shullow shafts anot in the surface clay or in the upper limestone beds and very much in the same way that the lead of Central Missouri has been

inned until quite recently.

In Madison county saveral new mines have been opened up during the year. The Catherine Lead com oany commenced milling its ore one car ago; the two shafts belonging to this company are located about three miles northwest of Fredericktown, while the mill is much nearer that place, the ore being conveyed from the mines to the mill by an overhead tramway 2000 feet in length. Recently in one of the ickel and cobait was found follow- Hill, in said county, on Monday, Pebrung the base run of lead. We had ary 10, 1902. the pleasure of examining it on two drifts and also noticed a quantity of the valuable mineral stored in a bin. on the surface. It is hoped that the nickel may be found in such quantity as to overcome the difficulties 23, 1941, before E. W. McKee, Justice and that it may prove a source of county, Missouri, one dark igon gray considerable revenue to the community, mare mule, 3 years old past, with white pany. Madisou county already has spot in forebead, branded with it on left the reputation of producing more sholder, about 13% hands high; also, one nickel than all of the other states of hay mare mule, one year old past, about the Union combined. The most im- 1834 hands high, no marks on brands portant development in the quanty visible. of recent years is at the Buckeys Appraised at forty-five dollars by D.

mine, located about one male south M. McDenis, James E. Davis and W. H. east from Fredericktown, Mesers. Sratman. Frank Stoneman and Joseph Davidson, of Columbus, Ohio, are the parties who opened the mines. At the time of our visit the mine was closed and we were informed that administration upon the estate of Sarah, or than any other remedy. Aday arision for children to take and always can east to perfect an opening the country of Bollinger county. Miseast to perfect an organization to source deceased, have been granted to the secure a plant which is to be first undersigned, W. K. Chandler, by the class in all of its appointments. Probate court of the county of Bollinger four months in the year he can hardly Judge Fox, of Fredericktown, recommended us to Mr. Frank Kassa-baum, who had been acting as ground foreman in this mine, as a ed to exhibit them to me for allowance get to the postoffice for his mail and we ville will stimulate our people to action along that line of public improvement, miner of experience and entirely within one year from date of said letters, reliable. From Mr. Kasanbaum we or they may be precluded from any benlearned that prior to the sinking of sait of such estate, if such claims be not the shaft, 48 diamond drill holes had exhibited within two years, from date of been bored, and that but one of them said lotters, they will be forever barred. proved to be entirely blank; that the shaft was sunk to a depth of 270 feet, and the last 30 feet in good disseminated lead ore; that a drift had been driven into the ore some 28 feet in length and 28 feet wide and that the ore improved as they progressed. We were disappointed in finding the mine closed, but bad an opportunity of examining the ore. The citizens of Fredericktown are immensely pleased with the prospect and the good people of the town have good reason for their excitement, Mine La Motte, some four miles north of Fredericktown, is a ooted mine, having been a producer of lead since 1720 and of disseminat ting relatives in this city, returned to ed lead since 1878. This property

embraces a solid sereage of 38,000 acres of which mineral has been demonstrated on \$2,000 acres. I his entire tract of land is owner by Mr. Leathe of St. Louis; there 110 farms on the estate, several shafts, mills and smelter. The product of this mine could easily be doubled, but as Mr. Leathe is quite an old man, it is probable he prefers to operate with as little annoyance as possible. The New Year Ball in Lutesville Hall It is this nine that produces the was well attended and a very enjoyable | nickel refered to, and will here note the fact that on the property where the Buckeye mine is located, many years ago a large amount of copper ras mined and we were shown some copper taken out of the shaft lately

suck at the Buckeye. Diamond drilling in Southeast Missouri has done more for the development of that section than any other agency, and, while it is true that the sinking of shafts for the urpose of prospecting is impraclicable, because of the great depths to the ore, yet the result of systematic drilling is too apparent to be lost sight of. That some idea may be formed of the amount of drilling done, an officer of one of the large companies informed us that in the two past years, his company had drilled what was equivalent to 85 miles. Where the drills are owned by the company, the dismonds set and reset by their own employer and the drillers have had experience, that the average cost of drilling per foot, for a depth of 500 feet has been less than 50 cents per foot.
